PROFESSIONAL PROFILE

Software Development and Quality Technician with hands-on experience building Full Stack applications as a freelancer since 2024. Interested in building scalable products by applying good development practices and agile methodologies. I combine solid technical execution —both in Frontend and Backend— with a strategic focus on user experience and conversion, motivated to take on new challenges and grow professionally within a team.

EXPERIENCE

Full Stack Developer | Freelance *Apr. 2024 – Present*

- End-to-end development of Full Stack web applications for real clients
- Implementation of responsive, reusable interfaces with HTML5, CSS3, React and Tailwind
- Integration of interfaces with REST APIs and application state management
- Backend development with Node.js, Express.js and MongoDB
- Optimization of user experience (UX) and application performance
- Autonomous management of projects, deadlines and direct client communication

Sales Associate | Miluna Accesorios *Aug. 2022 – Mar. 2023*

- Customer service, stock accounting and inventory management

FEATURED PROJECTS
